

Multi Vendor Compliance Service Plans

Performance Validation (PV) Agreements

- Most comprehensive compliance service program available as it covers a wide range of instrument manufacturers and models.
- Multi-level, multi-point NIST traceable verification of laboratory instrumentation.
- Fully documented and ready for any audit purpose.
- Performed on a modular basis rather than a system approach, this allows for system components to be removed without compromising the integrity of the remaining system.
- Significant cost savings.

Maintenance Qualification (MQ) Agreements

- Most economical compliance service plan available.
- Validates laboratory instrumentation to a single point or function.
- Performed after a repair or as needed to re-certify the annual validation.
- Utilizes NIST traceable standards and is fully documented.

Delta's Compliance Program is the most comprehensive in the industry.

Multi Vendor Compliance Services

Regulatory compliance can be challenging. For companies that utilize many different types and brands of analytical instrumentation the task can be daunting. Delta offers a qualification solution based on a metrology approach, which is applicable across a variety of instruments, regardless of manufacturer. Laboratories that are looking for ways to streamline operations and increase productivity can rely on Delta's multi-vendor compliance services.

There is no longer a need to call a different manufacturer to qualify each and every piece of instrumentation in your lab. Delta is a single source and your single source solution. No matter the manufacturer, Delta has the expertise and methods to assure accurate qualifications of most laboratory equipment. Delta eliminates the time, challenges and costs of managing multiple vendors.

Delta offers qualification processes that are totally independent of the equipment manufacturer. All procedures are created with a metrology mindset. All documentation and delivery equipment follow strict change control processes and systems are calibrated to NIST standards.

Experience Counts

Delta has provided customers with over 23,000 instrument service calls since 1986!
